PERSONAL PROJECTS

Echo-Meet - Video Call Application, 2Months

- Developed and led the implementation of Echo-Meet, a cutting-edge video call application designed for seamless virtual communication. Leveraged WebRTC technology for real-time audio and video streaming, ensuring low-latency and high-quality calls.
- **Key Achievements:** User-Centric Design: Spearheaded the user interface design, emphasizing user-friendly controls for an intuitive experience. Cross-Browser Compatibility: Ensured optimal performance across multiple browsers, enhancing accessibility. Scalability: Engineered the application to handle large concurrent calls, optimizing server-side architecture for scalability.
- **Technologies Used:** HTML, CSS, JavaScript, WebRTC for real-time communication, React for frontend development, Git for version control.

Sketchbook - Interactive Drawing App, 2 Months

- Designed and developed an interactive drawing application, Sketchbook, using Next.js. Leveraged the power of React for a dynamic user interface, providing users with a seamless drawing experience. Implemented real-time rendering and collaboration features, allowing multiple users to sketch simultaneously. The app supports various brush styles, colors, and export options. .
- **Key Achievements:** Developed the front-end using Next.js, React, and TypeScript, ensuring a responsive and engaging user interface. Implemented real-time collaboration features using WebSockets, enabling users to sketch together in real-time. Integrated diverse brush styles, color options, and export functionalities, enhancing the overall user experience.
- **Technologies Used:** Next.js, React, TypeScript, WebSockets, HTML, CSS
